Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 7 recites the limitation "the tuner box" in line 2. There is insufficient antecedent basis for this limitation in the claim. Claim 9 depends from claim 7 and includes all the limitations of claim 7 yet does not clarify the deficiency in claim 7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4,14-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schindler (5675390).

codes and upon receiving a signal from a remote control the signal is translated to control the operations of AV devices coupled to the PC. See col. 18 lines 30+. Because the translation of signals to control codes occurs by mapping the received signal to known (stored) codes in the PC, it can be considered utilizing a look-up table to provide the associations regardless of the name of the board which does the translations. Such a translation inherently requires a program running in the PC in order to operate. Figure 14c shows DVD and DVR functions.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5-13,19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schindler (5675390) as applied to claims 1-4,14-18 above, and further in view of Bauersachs (2004/0025189).

In an analogous art, Bauersachs shows a connector to receive the remote control signals, where the connector is a tuner box that receives IR signals. See paragraph 105. This allows the use of the OEM remote control and OEM remote control codes that are subsequently converted to be used in the present system.

Art Unit: 2635

Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used a tuner box as the receiver of the IR remote control signals to enable the use of the OEM remote control in the Schindler '390 system.
